Professional Working Proficiency

Electronics and Communication Engineering student with a strong interest in software development, specializing in backend technologies using Java and Spring Boot. Passionate about building scalable, secure applications and continuously improving programming, problem-solving, and system design skills through hands-on projects. Actively transitioning into a backend engineering role with experience in developing RESTful APIs, implementing authentication systems, and working with modern development tools and cloud-native technologies.

Education

KPR Institute of Engineering and Technology

Bachelor of Engineering • CGPA: 7.96

Electronics and Communication Engineering

Coimbatore, Tamil Nadu • 2023 - 2027

Internship experience

Infosys Springboard

online mode | Remote

Virtual Intern

2 months

- Completed a virtual internship program focused on software development practices.
- Developed a **Task Reminder Application** using Spring Boot and Java.
- Implemented backend logic to manage and schedule reminders.

Project Repository: [github.com/DakaraiMahisa/task-reminder-app](#)

Projects

Task Reminder Application

2 months

Technologies: Java, Spring Boot, REST API,Thymeleaf

- Built a backend application for managing reminder tasks with RESTful APIs and thymeleaf using Java and Spring Boot.

<https://github.com/DakaraiMahisa/task-reminder-app>

SME Inventory Management System

Ongoing

Developing a multi-tenant inventory management platform for SMEs using Spring Boot and React, featuring JWT-based authentication, role-based access control, inventory tracking, and real-time reporting.

<https://github.com/DakaraiMahisa/stockpilotbackend>

Task Tracker

1 week

Developed a task management application with user authentication and a basic dashboard to learn containerization and orchestration using Docker and Kubernetes.
