HackerRank: [DakaraiMahisa](#)

Technical Skills

Backend: Spring Boot • Spring Security • Spring Data JPA • Hibernate • JWT

Frontend: React • TypeScript • Tailwind CSS

Databases: PostgreSQL • MySQL • MongoDB • Redis

DevOps: Docker • RabbitMQ • GitHub Actions

Languages: Java • Python • JavaScript • SQL

Tools: Git • Maven • Flyway • Postman • Swagger

Education

KPR Institute of Engineering and Technology

Bachelor of Engineering (B.E.) in Electronics and Communication Engineering

2023 – Present (Expected 2027) • Coimbatore, Tamil Nadu, India

CGPA: 7.98 / 10

Certifications

Java Foundation Certification •

Infosys Springboard • 2025

Problem Solving (Basic) • HackerRank • 2026

Network Basics • Cisco Networking Academy • 2025

Virtual Internship • Infosys Springboard • 2026

Languages

English • Professional Proficiency

Professional Summary

Electronics and Communication Engineering student specializing in Java backend development. Skilled in Spring Boot, React, PostgreSQL, Docker, and enterprise application development, with a strong interest in building scalable, secure, and maintainable software solutions.

Projects

StockPilot – SME Business Management Platform

[GitHub Repository](#)

Developing a multi-tenant enterprise platform for inventory, sales, user management, taxation, and business operations.

Tech: Java • Spring Boot • React • PostgreSQL • Redis • RabbitMQ • Docker • JWT

- Built a modular multi-tenant enterprise architecture.
- Implemented JWT authentication, RBAC, and refresh token rotation.
- Integrated PostgreSQL, Redis, RabbitMQ, Docker, and Flyway.

Task Reminder Application

[GitHub Repository](#)

A Spring MVC web application for task scheduling and automated email reminders.

Tech: Java • Spring Boot • Spring MVC • Thymeleaf • MySQL

- Built a Spring MVC and Thymeleaf web application.
- Implemented email reminders using Spring Mail.
- Designed CRUD functionality with MySQL persistence.

Experience

Virtual Software Engineering Intern

Infosys Springboard

2 Months

- Built a Task Reminder Web Application using Spring Boot, Spring MVC, and Thymeleaf.
- Implemented CRUD operations, business logic, and MySQL data persistence.
- Applied the Model-View-Controller (MVC) architecture and industry-standard software development practices.
